EDUCATION

I have been involved in teaching for many years. To date this has been mainly with postgraduates. As a member of the SAC for Otolaryngology when a registrar I was involved in the formulation of an educational programme to be used from Year 1 to Year 6 in assessing clinical competencies. I continued this as a consultant member of the SAC.

From 2005 to 2008 I established and edited 'The Otorhinolaryngologist'. This was a journal specifically for post graduate education in otolaryngology. I resigned in 2008 due to other commitments but I have continued as a member of the editorial board. I have since been involved in the education of undergraduates within the hospital. I am also in the process of establishing a website with free access for medical students to learn from teaching videos.

I teach on several national courses to GPs, Registrars and ENT Consultants. I also teach on the Special Senses Block for Leicester Medical Students.

MEDICOLEGAL EXPERIENCE

I have provided approximately seven hundred reports specifically relating to noise induced hearing loss. These have been requested by those representing the claimant in the main, but each report has been prepared in the manner of a single expert witness

on behalf of the court. In addition I prepare between 5 and 20 reports a year which are related to facial trauma etc including rhinoplasty issues.
